IT'S
DONE.**

©

Since 2023 Capi is a proud certified **B Corporation**, with a score of **95 points!**

This shows that one of the company's goals is to have a significantly positive impact on society and the environment at large.

For more information:
www.bcorporation.net

We developed our own method of **rotational molding**.

With the robots, we can produce up to:

1.700 pots per day

50.000 pots per month

600.000 pots per year!

The planters in the **Made in Holland** collection contain wood fibres to give it a stone-look structure. This wood is **PEFC certified**. This means that the wood comes from a sustainably managed forest.

Grow a greener life.

is more than words in a corporate mission statement. Taking care of the planet and each other is in our roots.

98%

RECYCLED PLASTIC

Certified by **RecyClass**

The Cork collection is **RecyClass certified**, which proves that the material in the pots is actually made from recycled material.

In this case **98,6%**.

Made in Holland Production.

We have developed its own rotation moulding method for the production of Made in Holland pots. We are unique throughout the world in using this particular rotation moulding technique. With this process we save up to 80% of the energy compared to traditional rotation moulding.

01 Raw material

Mixture of polyethylene made with recycled material and PEFC certified wood fibres.

02 Big bags

The raw material hangs in big bags. Each big bag contains its own colThe.

03 Filling system

The raw materials are automatically pTheed into the mould, using a filling system.

04 Own rotational moulding process

The mould is heated in order to melt and liquefy the powder. The machines spin around so the mixture is distributed throughout the mould. The substance is then cooled to produce the flower pot.

05 Orange inside

The two layers of the pot (outer layer and insulating layer) are made in a single cycle.

06 Moulds

Each pot model, texture, and size has its own mould.

11 Finishing robot

The second robot removes the sharp edges in the pot.

10 Scan station

At the scanning station, the pot is recognised by multiple cameras. The rest of the robots of the finishing line now know what to do with the pot.

07 Day & night

The robots work 24 hThe for 5 days a week.

08 Mould to belt

As soon as the robot is finished, the pot will automatically be taken to the conveyor belt.

09 Conveyor belt

The conveyor belt takes the pot to the finishing and painting area. First stop: scanning station.

12 No waste!

The edges coming of the pot will go into The own shredder. This means there is no waste during The whole production process.

13 Back to the roots

The material coming from The shredder goes back to The supplier. There they will be used for new materials.

14 Transportation

A small conveyor belt transports the pot from stage to stage. Every stage has it's own robot that takes the pot from the belt into a specific cell. If the pot does not need to be painted, the conveyor belt will take it directly to the end of the belt.

14

16 The last step

The last step: a label and a potcard.The pot is now completely finished and ready to hit the stores!

15 End of the belt

There it is, a freshly painted or non-painted pot ready for the last step.

The orange interior.

The well-known Made in Holland pots all feature an orange interior. The orange inside is a recognisable feature of The brand. This is for several reasons. Read here why:

Made in Holland.

The pots with the orange interior are all made in Tilburg (NL). Orange is of course the symbol of the Netherlands, look for instance at the shirts of the Dutch national team. Worldwide, the colour orange represents the Netherlands.

Insulating layer for plants.

The orange inside is actually a second layer that acts as an insulating layer. It protects the plant's roots against cold in winter and heat in summer.

Extra strength.

The orange layer also makes the pot extra strong. And that makes it fracture-resistant.

The symbol for reshoring.

For various reasons, we brought production back to the Netherlands 10 years ago. A difficult word for this is reshoring. To recognize the Dutch pots, they were therefore given an orange interior.

Indoor & outdoor.

The Made in Holland pots can be used indoor and outdoor. They are 100% watertight, making them perfect for indoor use. For outdoor use, you only have to drill a 25mm hole to ensure water drainage.

Indoor

100% watertight

Outdoor

25 mm

With the orange interior.

The Dutch touch.

The Made in Holland collection is produced in The factory in Tilburg. Because of The own production process, we are able to manufacture high quality flower pots, which are 100% recyclable and come with a lifetime warranty.

The orange interior of these pots is intended to represent their

place of origin and has become a recognisable feature of The brand. The orange layer also provides the planters with insulation, offering the roots of the plants extra protection against both heat and cold. This extra layer provides extra firmness to the planter, which makes it fracture-resistant.

LIFETIME WARRANTY

The Golden touch.

Designed to add a touch of glamour and elegance to your interior, making them true eye-catchers that are sure to impress.

The addition of the golden colour to the Clay, Rib, and Groove pots brings a sense of luxury to any room. You can find all models on the next page.

Giving waste a new purpose.

THE CORK COLLECTION.

MADE FROM 98.6% RECYCLED MATERIALS

VINVENTIONS

[Click for more information.](#)

Where does it come from?

The Cork collection is made from **94%** used plastic corks. The cork comes from the French company Vinventions, that makes synthetic corks and screwcaps for wine bottles. They have a cork recycling program and the used corks are purchased and transformed into raw material. The proceeds from this go to associations such as cancer funds.

To make the pot complete, **4%** agricultural ropes and a splash of used fishing nets (**1%**) are added.

Just like the rest of The Madein Holland collection, these pots are made in The factory in Holland and come with a lifetime warranty. The collection is available in a bright beige colThe, in two stunning textures: Rib and Smooth.

RecyClass certified

This collection is **98,6%** Recyclass certified, showing that this collection actually consists of recycled materials. In The case by **98,6%**! The certification focuses on the traceability of recycled plastics within a process and the verification of a given percentage of recycled plastic content in products.

After all, does a product actually consist of what it says? wanted to proof that what we say about the recycled materials in this collection is true. That's where we called in Recyclass. What about the other 1,4%? These are additives to bind the materials.

LIFETIME WARRANTY

We received the **RecyClass certificate** for the Cork collection.

Nature NL Cork

This collection is available in two stunning textures: Rib and Smooth. The Rib texture adds a contemporary touch with its sleek lines, while the Smooth texture offers a more elegant and refined look.

Biodiversity collection

Pictured: Rain barrel Groove Black 330L RGVBL2000

Catch rainwater when it falls.

The climate is changing and the weather is becoming more extreme. There are more days with heavy and prolonged rainfall. And at the same time, there are more periods of sustained heat and drought. This has many adverse consequences. To help maintain a water friendly garden, has developed several design rain barrels.

In today's world, where climate change has led to erratic weather patterns and increasing heat, the problem of rainwater runoff and heat build-up in urban areas has become a significant issue. Excessive rainwater runoff not only contributes to flooding but also exacerbates the urban heat island effect, making outdoor spaces uncomfortable and less sustainable.

Fortunately, 's rain barrels offer an effective solution to this problem. By collecting rainwater from rooftops, this precious resource can be stored and utilized for the garden's irrigation needs. You can replenish the plants with this natural resource, reducing the need for tap water consumption. This not only saves money on water bills but also minimizes the strain on local water supplies.

The rain barrels are available in a variety of sizes, ensuring that you can find the perfect fit for your needs. Whether you have a small garden or a larger outdoor space, there's a rain barrel that suits your requirements. Additionally, the two different textures available allow you to choose a design that complements your aesthetic preferences and seamlessly integrates into your garden.

All rain barrels come with a planter on top. This way you can also add some extra green to your garden. Fill the planter on top with some flowers that attract birds, bees or butterflies to boost the biodiversity in your garden.

Did you know... Rain water is better for your plants than tap water, because it contains less chalk!

Warranty

Just as The Made in Holland collection, The rain barrels come with a **lifetime warranty**. The barrels are very sturdy, weather resistant and can hold a lot of water. The accessories of the rain barrel come with a 5 year warranty and can be replaced easily without moving the rain barrel.

LIFETIME WARRANTY 5 YEAR WARRANTY

Available in two textures and two colors:

All the rain barrels are provided with a **luxurious metal tap** including garden hose connection!

The rain barrel come with a **planter** on top.

Rain barrels

Introducing the rain barrels with two captivating textures: Rib and Groove. The Groove texture adds a unique touch, featuring stylish grooves that create a visually appealing and contemporary look. The Rib texture remains very classic and has a slightly more natural look. Both textures are available in different models and two different colThees.

Pictured: Oval Butterfly Hotel - Brown AOBUB001

Contribute to biodiversity.

Discover the Biodiversity Collection, a range of bird- & insect houses designed to support biodiversity in yThe garden or outdoor space. Available in two shapes, oval and hive, and two earthy colThes, brownand anthracite. These houses seamlessly blend into natural surroundings while providing a safe haven for various species.

The gardens all around the world are consisting more and more of stone. And that's a shame, because insects and birds have less space to do what they are made for. Because a green lifestyle is very important for a lot of people and to help the animals, we have designed the biodiversity collection.

The Biodiversity Collection features a variety of houses, including birdhouses, butterfly houses, and bee hotels, each tailored to attract specific creatures.

From providing nesting sites for birds to creating habitats for butterflies and essential pollinators like bees, these houses play a vital role in supporting biodiversity.

The oval models have a natural shape so they fit in every garden. The Hive models have a modern geometric design, including a **click & combine** clip on the back. For the birdhouses, we have two different sizes of opening, attracting different bird species depending on the size of the opening.

Available in two shapes and two colThes:

The Hive models have a **click & combine** clip on the back. With this clip you can easily click several bird- or insecthouses from this collection together. This way you can create full biodiversity wall or some bird villa's in yThe garden!

The bird houses attracts different bird species, for example:

Bird house 1

Groove 'Made With'

Pictured: Groove Sawdust White IGSW532 - IGSW533 - IGSW534

Pots made with recycled materials.

Revolutionize your indoor decor with the Groove Made With collection, a range of pots that combines stunning design with responsibility. Crafted through injection moulding, these pots are not only visually striking but also made from recycled materials, embodying a commitment to sustainability.

This Indoor Collection features pots made with textiles, artificial grass, sawdust, medical waste and rice husk. Each pot tells a story of repurposing and transforming one of these residuals into something beautiful.

The beige pots are made with sawdust, giving it a soft beige colour. This way wood waste is no longer waste and gets a new purpose. Then there is a fresh green colour made with artificial grass. Literally and figuratively a piece of green in your home. The black pots are made with textile. Thus, old clothes and other textile do not have to be burned, but they get a new life. The Metallic Copper pots are made with 99% waste, the highest percentage possible! This year we introduce two new colours:

Warm Taupe and Peachy Fuzz, made with rice husk. Beautiful pots with their own story for a better world.

Available in three different sizes, these pots are suitable for different plants and spaces, providing endless possibilities for adding green in your home or office. Additionally, this collection comes with a lifetime warranty, ensuring the quality and long lifespan.

You not only enhance your indoor spaces but also contribute to the reduction of waste. These pots serve as a powerful reminder that taking care is not that hard.

Prefer using these pots outside? No problem. Just drill a drainage hole in the bottom so you can decorate your balcony or outside tables.

Mix & Match
different
colthes!

Groove Colthes

The Groove Colthes collection combines a natural touch with remarkable colthes. This way a coltheful and extraordinary look has been added in the collection. Pick your favorite colthe or mix and match them all together.

The Groove collection is, as the name says, inspired by grooves. From the vertical grooves in rocks and mountains that arise from natural changes occurring over the years.

Retro Gold

The Retro is inspired by the old and the new. Gold or copper, round shapes and a smooth design. Mix old and new together to create a luxurious look. Besides the gold, a copper colThe has recently been introduced. This colThe is shiny, dark and a bit mysterious at the same time.

We can help you create the best presentations in yThe store.

Please contact us for the options.

Shelf planning yThe store.

For The customers we can provide customised shelf, floor, and store plans. Thanks to The experience and product knowledge we can help you with the best product presentations.

Please contact us for the options in yThe store.

For The indoor & outdoor collection we advise shelf plans, floor plans, or a combination of these two. We combine this with The Point of Sales materials and customized signing. This way you can provide the right information to yThe customers together with inspiration through The lifestyle images.

corner

To help you setting up the perfect Capi corner in yThe garden centre, we can create a store plan together. We will combine shelf plans and floor presentations with pot-plant corners to create full Capi Experience. The combination of The indoor & outdoor collection, The rain barrels and biodiversity products together with plant tables ensure a green oasis in yThe store.

Year round pallet promotion.

Warranty & service.

5 YEAR WARRANTY 10 YEAR WARRANTY LIFETIME WARRANTY

Every single product comes with a warranty. The Made in Holland collection comes with a **lifetime warranty** on manufacturing defects when the products are being used properly. We are proud to offer a lifetime warranty on these products to show you that we believe in the quality and long lifespan of the products. We live in a consumer society where we want to sell as many pots as we can. But we don't want people to buy a pot and just use it for a few years to throw it away afterwards to buy a new one. We would like to make sustainable design pots that last a lifetime!

The rest of the collection comes with a **5 or 10 year warranty** on manufacturing defects. These warranty rules only apply when the products are being used properly. Every product had its own label that shows the warranty period for that specific product.

If anything happens to a product when it is in use, or when a customer comes back with a complaint about a product, please do not hesitate to contact the service department. We are happy to help you. Please visit capi-europe.com/en/guarantees/, fill out the form and we will make sure you will be assisted as soon as possible.

It will be very helpful if you would describe and attach the following:

- Description of the complaint.
- Type of product and size.
- Photos of the product and their defect.
- Purchase receipt.

[Go directly to the warranty page on the website.](#)

Filling tip.

1. Choose an impressive plant.
2. Fill the planter for 1/3 with hydro grains.
3. Fill the planter for 2/3 with soil.
4. Put the impressive plant in the soil.
5. Enjoy the growth.

Outdoor use? Please drill a 25mm hole to ensure water drainage and place the drainage cap on top (see page 67).

The warranty rules apply when the products are being used properly. There are some things to take in mind when using a planter;

- Planters need a drainage hole when being used outdoors. This allows the roots of the plants to breathe and it makes sure the water can drain off. This drainage hole also makes the planter frost-resistant. In addition, it is important that the pot is kept off the ground in frosty conditions. If the pot has a flat bottom, it can be placed on pot feet or a trolley.

- Make sure the drainage hole is at least 25mm, otherwise it may be clogged by the hydro grains in the pot. If the pot doesn't have enough drainage, the plant will be standing in too much water for too long (and the pot won't be frost-resistant). Poor drainage can also cause calcification on the outside of the pot. This is easy to clean, but even easier to prevent with a good drainage.

- When the pot is filled, it is less easy to move it because of its weight. Therefore, find a suitable spot in advance. If you do want to move the pot (e.g. because plants have to go inside during the winter), preferably use a trolley or lift the pot at the bottom with two people. Do not lift the pot by the

edges, but at the bottom. The edges are no longer fracture-resistant when the pot is fully filled, because of the weight.

- Not all plants are suitable for pots. The pots are only fracture-resistant if the potted plants and their roots remain in proportion. Plants with fast-growing roots, create increasing pressure and are not suitable for placing in flower pots. These include tree species, fast-growing plants and, for example, bamboo. These plants are mainly suitable for placing in the ground. If you want to put them in a nice pot, make sure you regularly repot them to a larger pot. If in doubt, always contact the service department or ask for advice in the garden center.

- Make sure the plants are in proportion with the planter you place them in. If the plant is too big or too high the plants probably do not have enough space to grow, and the pot probably can't hold the plant, in gusts of wind for example, because the pot is not heavy enough to stay upright.

Feel free to contact the service department if you have any questions.

Happy to help.

Certified

This company meets high standards of social and environmental impact.

Scanbook.

As a business customer, it can be helpful to do a quick search for articles. For this reason we are offering a scanbook.

The scanbook contains all articles that can be ordered. This includes both the sets, and the articles that are available individually. In addition to the article details and barcodes, you can find the order unit and the dimensions of the products. We hope this will make ordering a lot easier and faster.
