# The materials we use

---

## **Fiberstone** essential collection | Natural collection | Platinum collection

Quality is of great importance to fiberstone and therefore we are very proud of the fiberstone material. fiberstone is based on the precious natural stone. The material consists of a mixture of fiberglass and stone powder. This combination ensures a durable material that is suitable for both indoor and outdoor use at any temperature. The high quality means that the products will last for years. The unique characteristics such as the different appearances, light weight and low maintenance makes this material a better alternative for planters and pottery. Fiberstone comes in a natural black or grey finish as well as a glossy or matte painted colour or the exclusive platinum finish. Please note: Items with a platinum finish are for indoor use only and should not be exposed to direct sunlight.

## **Ficonstone** Stone collection | Cement collection | Ridged collection

Ficonstone is a material made of fiberglass, cement, sand and finely ground stone. Ficonstone has a natural feeling and is slightly more heavy than fiberstone. The difference between fiberstone and ficonstone are the weight, the pricing and the finishing. The material is suitable for indoor and outdoor use in any weather. Ficonstone comes in three collections and in eight finishes. The Stone collection offers a coarse finish in two colours, Laterite grey and Light brushed. The Cement collection comes in a smooth finish in Charcoal or Sand cement. And the Ridged collection is offered in two colours, Dark grey and Light grey, either with a horizontal or vertical ridge.

## **Sandstone** Refined collection

The Sandstone material is a strong material composed of poly resin, stone powder and colour pigment. The material is ideally suited for round shapes. Very fine and thin lines are visible on the planters, which gives them their unique characteristic look. The sandstone material is offered in the Refined collection in various matte and earthy colours.

## **Fiberclay** Rough collection

Fiberclay is a material from cement concrete mixed with glass fibers. The glass fibers reinforce the concrete base of this material. Due to the composition of this material it can only be used for round shapes. The material is moulded inside soft silicone, to give the planters their round shape. This way of production is similar to earth ware and clay productions, which explains the name of this material.

**‘we aim for an assortment that is made from durable materials that will last indoor and outdoor.’**

# Colour overview

## eNG |

Our colours have their own code (letters or numbers) and names. The colour code is always the last part of the article code of a product. In this overview we have tried to portray our colours as accurate as possible. Nevertheless it can happen that the shown colours may look different in reality. Please contact [onno@koberg.nl](mailto:onno@koberg.nl) to receive a colour sample or more information.

## NL |

Onze kleuren hebben hun eigen code (letters of nummers) en namen. De kleur code is altijd het laatste deel van de artikelcode van een product. In dit overzicht hebben we geprobeerd de kleuren zo goed mogelijk weer te geven. Het kan echter voorkomen dat de kleuren in print of op het beeldscherm van uw computer anders overkomen dan in werkelijkheid. Neem contact op met [onno@koberg.nl](mailto:onno@koberg.nl) om een kleursample of meer informatie te ontvangen.

## FR |

Nos couleurs ont leur propre code (lettres ou chiffres) et noms. Le code de couleur est toujours la dernière partie du code d'article d'un produit. Dans cet aperçu nous avons essayé de montrer nos couleurs le plus précis possible. Néanmoins, il est possible que les couleurs indiqués peuvent être différents en vraie. Merci de contacter [onno@koberg.nl](mailto:onno@koberg.nl) pour recevoir un échantillon de couleur ou de plus samples renseignements.

## De |

Unsere Farben haben ihren eigenen Code (Buchstaben oder Zahlen) und Namen. Der Farbcode ist immer der letzte Teil des Artikelcodes eines Produkts. In dieser Übersicht haben wir versucht, die Farben so gut wie möglich darzustellen. Es ist jedoch möglich, dass die Farben im Druck oder auf dem Bildschirm Ihres Computers anders aussehen als in der Realität. Wenden Sie sich an [sales@potterypots.nl](mailto:sales@potterypots.nl), um ein Farbmuster oder weitere Informationen zu erhalten.

# essential collection

fiberstone

The essential collection consists of a wide range of basic and design planters all recognizable for their simple and clever design in either a glossy or matte painted finish. All items in this collection are made from the strong material fiberstone. The power of this collection is its simplicity. The simple design of the products makes them perfect for any environment.

# Natural collection

fiberstone

The Natural collection is a large collection of basic and design planters all recognizable for their natural finish. All items in this collection are made from the strong material fiberstone. The look and feel are almost indistinguishable from real and more expensive natural stone. Because of the various sizes there will be a solution for any place.

\*The black finish in this collection is not UV resistant.  
Keep it black with our maintenance oil. See pg. 192.

Indoor

Outdoor

Frost  
resistant

# Platinum collection

fiberstone

The Platinum collection is , as the name indicates, the most exclusive collection within the fiberstone range. The platinum finish is unique in combination with our strong fiberstone material. This is a collection of purely eye-catching luxury pots made from high quality material with an exceptional finish.

**Please note:** The items in this collection are for indoor use only and should not be exposed to direct sunlight.

# Cement collection

ficonstone

The Cement collection is a small collection of bestsellers in a special finish. The finish of the planters has the feeling of a fresh plastered wall. The smooth finish with uneven colour shades, give the products in this collection their cool and contemporary look. The robust ficonstone material is suitable for both indoor and outdoor and can therefore be placed in any environment.

# Ridged collection

ficonstone

The Ridged collection is a classic collection with round shaped pottery and planters available in all kind of small and basic sizes. The pots have a delicate ribbed surface which makes them sturdy but elegant classics. The characteristic planters from the Ridged collection are made from ficonstone and can be used both indoor and outdoor.

# Rough collection

fiberclay

The Rough collection is the rebellious one of the fiberstone family. With its 'less is more' mentality, the Rough collection focuses on the tough character of the pot. The collection, with a fiberclay basis, consists of modern planters with the same characteristic finish in many different colours.

# Refined collection

sandstone

Deep, warm and soft shades derived from nature, are the basis of the new fiberstone Refined collection. Specially designed to bring back serenity and simplicity in the interior. The matte finish provides an earthy and pure sense of calm. Simple shapes and sleek finishes make this collection elegant and tasteful. The refined collection is made from sandstone, which makes it a lightweight strong and refined collection.

Due to our large warehouse  
we can deliver most of our  
items directly from stock

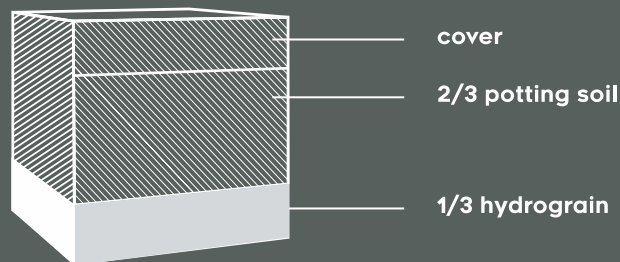

# Use & care

Our Use and Care range offers various products to maintain or upgrade your fiberstone planters. Most of our products can be used both indoor and outdoor. When products are placed outdoor a different treatment is required from indoor use. The Use and Care accessories keep your products in the best condition possible.

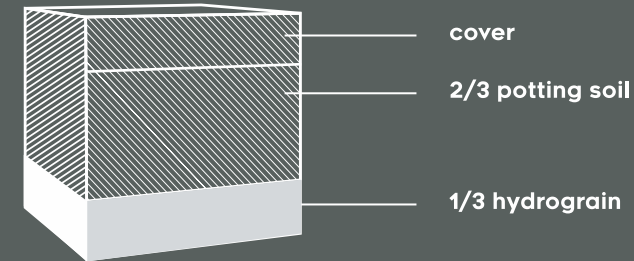

# Instructions

## Indoor

- Cover the inside with a water-resistant inner tray or pond liner.
- Put the planter in the right place.
- Fill the planter with 1/3 of hydro grain. The hydro grains contribute to the water management and make sure that your plants grow better.
- Then fill the planter with 2/3 of potting soil and place the plant in the planter.
- Last you can choose to cover the soil with a decorative layer of hydro grain, bark chips or groundcover plants.
- After filling the planter, we recommend not to replace the planter. The weight of the hydro grain and the potting soil could cause damage to the planter.

## Outdoor

- Drill holes in the bottom of the planter. Use a 8-10 mm metal/wood drill.
- Drill several holes, the number of holes depends on the size of the planter. Document available upon request.
- Cover the holes with mesh, to make sure the soil cannot clog the holes.
- Make sure that planters without feet not directly make contact with the subsurface. Loose feet prevent this or a plant saucer can be used. See pg. 189.
- If you directly place a planter without feet on the subsurface, we recommend to drill the holes at the side of the planter instead of in the bottom. This best can be done 5 to 10 cm above the ground.
- A piece of duct tape placed where you want to drill the hole, will help keep the drill bit from slipping
- Fill the planter with 1/3 of hydro grain. The hydro grains contribute to the water management and make sure that your plants grow better.
- Then fill the planter with 2/3 of potting soil and place the plant in the planter.
- Last you can choose to cover the soil with a decorative layer of hydro grain, bark chips or groundcover plants.
- After filling the planter, we recommend not to replace the planter. The weight of the hydro grain and the potting soil could cause damage to the planter.

# Industrial Christmas

special collection

The Industrial Christmas is a small, tough collection of pottery, dishes and objects that perfectly fit in a pure interior. The raw appearance of concrete with the golden touch gives this modern and cool collection the right sparkle for the Christmas holidays, but comes well in a natural interior as well.
