## ABOUT OTIUM

AT OTIUM WE CHOOSE FOR THE ROTATIONAL MOULDING MANUFACTURING TECHNIQUE, THIS TECHNIQUE ALLOWS US TO WORK WITH A VERY DURABLE POLYETHYLENE PLASTIC WITH MANY ADVANTAGES. THE POLYETHYLENE PRODUCTS ARE QUITE LIGHT AND THEREFORE EASY TO MANIPULATE BUT SUFFICIENTLY STRONG, EVEN FOR PROLONGED OUTDOOR USE. MOREOVER, IT IS NOT SENSITIVE TO FROST OR EXTREME HEAT AND CAN BE 100% RECYCLED. OTIUM CHOOSES TO USE QUALITY RAW MATERIALS TO GUARANTEE THE COLOR FASTNESS.

DUE TO THE COMBINATION OF POLYETHYLENE AND ROTATIONAL MOULDING, WE CAN OFFER A VARIETY OF COLORS. BESIDES THE MANY COLORS OF THE PRODUCTS WE OFTEN PROVIDE DIFFERENT FINISHING OPTIONS SO THE CUSTOMER CAN COMPOSE SOMETHING THAT PERFECTLY FITS HIS OR HER ENVIRONMENT.

COLORS:

The Otium murus is ideal for creating more privacy in your garden or seating area. Perfect for combining with the Murus 27 to design a varying separation module both outdoor and indoor.

The **OTIUM MURUS** is high quality double walled polyethylene planter. Otium drainage system makes sure there is adequate drainage for the plants. When planting inside the drainage system can be closed by using the supplied screw cap with rubber seal.

The Murus bottom has an opening for extra weight in order to stabilize the pot. With the supplied screw you shut the back opening. We recommend to use sand or gravel as material for extra weight.

**WIDTH:** 90 X 27 cm

**HEIGHT:** 80 cm

### **MATERIAL COMPOUND POLYETHYLENE:**

Prolonged UV resistant  
Frost resistant  
Maintain its strength at high temperatures

### **DOUBLE:**

Insulation from frost  
Protection for heat (roots can not burn)  
Nice finish of the product

## DRAINAGE SYSTEM (PROVIDED IN ALL OTIUM POTS):

Potted plants need to be showcased in flowerpots equipped with a good drainage system in the event of over watering, whether from natural rainfall or over watering by an eager gardener.

Unless excess water can filter through the soil and drain away from the roots of your potted plants, the roots may develop root rot if they are exposed to standing water for an extended period of time. Root rot will eventually cause your potted plant to wither and die since it will rob the plant of the ability to draw moisture and nutrients from the soil.

## EXTRA WEIGHT SYSTEM (ONLY FOR OLLA135 AND MURUS 27 & 90)

Otium Olla135 and Murus (27&90) are provided with an extra weight system. The system is simply a closable opening. Through the free space between the two walls there is enough space to pour sand or gravel in the pot.

If enough weight is inserted, the pot will have extra stability and will not fall over in strong winds.
